ESSIC | International Society for the Study of BPS

A lot is happening in the world of chronic pelvic pain and bladder pain syndrome. Several new treatment modalities are under research, and much is being learnt from more extended clinical studies. Many items will be presented and discussed when we meet. With your help, ESSIC is in the process of being built into the World Scientific Society on these topics. Come and meet the Board Members and join the discussion also on the administrative and educational developments.
